

WIRING THE BRAIN

FROM GENETIC TO NEURONAL NETWORKS

21ST - 24TH APRIL 2009 ADARE, COUNTY LIMERICK, IRELAND.

This meeting will bring together researchers from diverse areas to discuss the mechanisms underlying the wiring of the mammalian brain and how variation in neurodevelopmental genes affects neuronal connectivity, influences behaviour and contributes to psychiatric and neurological disease.

KEYNOTE SPEAKERS:

STANISLAS DEHAENE, JOHN RUBENSTEIN, DANIEL WEINBERGER

PLENARY SPEAKERS:

Alain Chédotal, Karl Deisseroth, Jonathan Flint, Al Galaburda, Dan Geschwind, Michael Gill, Takao Hensch, Josh Huang, Annette Karmiloff-Smith, Mary-Claire King, Alex Kolodkin, David Linden, Oscar Marin, Andreas Meyer-Lindenberg, Henry Markram, Kirsty Millar, Bitá Moghaddam, Jeffrey Noebels, Luca Santarelli, Hongjun Song, Thomas Sudhof, Pierre Vanderhaeghen, Fan Wang, Marius Wernig

Abstract submission deadline October 17th, 2008. For more details see
