

# Autism Treatment Network

## *Strategic Overview 2010-2012*

### Our Vision:

To improve the lives of all children with ASD and their families by making a high quality, comprehensive, and multidisciplinary continuum of care accessible within local communities

### Our Mission:

The mission of the Autism Treatment Network (ATN) is to promote a sustainable national system of community accessible programs offering state-of-the-art comprehensive and coordinated medical care for all children and adolescents with autism spectrum disorders (ASD), and to develop evidence and support the improvement of medical care for these children and their families.

Our Values:	Our Goals:	Our Stakeholders
<p>Excellence</p> <p>Commitment</p> <p>Compassion</p> <p>Collaboration</p> <p>Innovation</p> <p>Scientific Rigor</p>	<p><b>Quality:</b> Improve the quality of medical care for children and adolescents with ASD</p> <p><b>Access:</b> Increase the availability of a comprehensive, coordinated, longitudinal care model for all children with ASD</p> <p><b>Research:</b> Advance the evidence base and research on medical issues in order to provide better care for children with ASD</p> <p><b>Leadership:</b> Become the leading clinical network on medical issues related to ASD</p>	<p>Families</p> <p>Clinicians</p> <p>Researchers</p> <p>Community</p> <p>Policymakers</p>
